SUMMARY

Frontend Developer with hands-on internship experience building real-world web applications using React.js, TypeScript, JavaScript, and Tailwind CSS. Experienced in employee management systems, responsive UI development, API integration, URL-based state management, 3D visualization, GIS/image extraction, and candidate portals. Built and contributed to 10+ web projects across professional, freelance, and personal work.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Redux Toolkit, Zustand, Context API, React Router

API & Backend: REST API Integration, React Query, PHP (Basic), MySQL (Basic), Node.js (Basic)

Programming Languages: JavaScript, TypeScript, Python (Basic)

Tools: Git, GitHub, Vite, Netlify, Vercel, VS Code, Docker

EXPERIENCE

AMX Innovation

June 2026 - Present

Frontend React Developer Intern (Full-Time)

Primary Project: Loop (Employee Management System)

- Built and improved employee management features for Loop using React.js and TypeScript.
- Developed reusable React components, including modals, for consistent UI patterns across the platform.
- Implemented URL/query-parameter-based state management with React Router's useSearchParams for pagination, search, filters, and tabs.
- Integrated REST APIs using React Query for data fetching across admin dashboard, People, leave, and attendance modules.
- Built responsive UI components and resolved TypeScript/UI issues, contributing to a production-oriented application.

Additional Contributions:

- 3D OBJ Viewer: Developed a web-based 3D model viewer using Three.js, with Node.js-based OBJ preprocessing, chunking, and lazy loading for large 3D file visualization.
- BBMP Drone / GIS Image Extraction: Built a workflow to extract drone/orthophoto imagery from GIS services (WMS/WCS), working with Leaflet and proj4 for mapping functionality.

Lynxperio

June 2026 - August 2026

Frontend Web Developer Intern (Flexible)

- Built a candidate/intern management portal (Candidate Portal) supporting 2 user roles (admin and candidate) with secure login flows, using HTML5, CSS3, JavaScript, and Tailwind CSS.
- Implemented document upload/download for 4+ document types, including resumes, offer letters, certificates, and LORs.
- Added search by name/ID, candidate profile pages, and certificate verification features.
- Contributed to the frontend of the Lynxperio company website, building multiple dynamic web pages and components with a semantic HTML structure using HTML5, CSS3, and JavaScript.

PROJECTS

Plastic Waste Management — Freelance Project

- Built a **full-stack plastic waste management platform** using HTML5, CSS3, JavaScript, and Tailwind CSS, with features for waste conversion, conversion history, statistics, and environmental impact tracking.
- Integrated the frontend with a PHP and MySQL backend to process conversion data, store user records, and retrieve recycling history without relying on external APIs.

Hotel Booking Website — Personal

[Live Site](#)

HTML · CSS · JavaScript · Tailwind CSS

- Developed a responsive **hotel booking website** with 5+ pages for hotel listings, room details, and booking flow sections.
- Built using a clean, component-based React architecture.

Currency Converter — Personal

[Live Site](#)

HTML5 · Tailwind CSS · JavaScript · REST API

- Integrated a live exchange rate REST API supporting real-time conversion across 160+ global currencies.
- Added a conversion history tracker and light/dark mode toggle within a responsive Tailwind CSS UI.

EDUCATION

B.Tech in Computer Science & Engineering — (AI/ML)

Pursuing

Technocrats Institute of Technology (TIT), RGPV University - Bhopal, M.P.

Diploma in Computer Science Engineering

Completed

Thakur Shivkumarsingh Memorial Polytechnic College, RGPV University - Burhanpur, M.P.
